The Tribal Air Monitoring Support (TAMS) Center’s online Technical Needs Assessment

The TAMS Center is seeking ways to identify the technical support requirements of tribal air quality programs nationwide. The goal of this Needs Assessment is to aid in the development of services that better meet tribal air program goals and objectives. The form asks for specific information related to both ambient air quality and indoor air quality concerns that affect Tribes. Input obtained through this online questionnaire will help identify focus areas and support needs so that future technical training and support can be tailored to for Tribes. Click [this link](#) to fill-out the online form. For any questions contact TAMS co-directors, Christopher

Lee at christopher.lee@nau.edu (702-784-8278) and/or Hayden Hardie at hardie.hayden@epa.gov (702-784-8232)

The Energy Impacts of COVID-19 HVAC Mitigation Strategies

Monday, February 22; 1pm ET / [Register Here](#)

What is the energy impact of major HVAC system operation guidance to reduce transmission of COVID-19 inside buildings across the U.S. commercial building stock? Speakers will discuss the energy implications of (1) 100% outdoor air ventilation rates, (2) installing MERV-13 filters or better, (3) disabling demand control ventilation, and (4) HVAC flushing mode operation. Analysis of these measures using ComStock provides a national view of the energy implications for various commercial building types in all U.S. climate zones.
