

UPCOMING CALLS/EVENTS/NOTICES

Ambient Air Quality/EPA/NTAA/Tribes

NEW! EPA Webinar: Clean Air Act List of Air Toxics Addition of 1-Bromopropane (1-BP)

Registration Required by *Noon, Wednesday, June 23*

On June 23, 2021, the EPA will host two webinars on the 1-BP Advance Notice of Proposed Rulemaking, or ANPRM. These webinars will provide an opportunity for the public to provide feedback concerning facilities located within their community that may be subject to the revisions or new emission standards. Each webinar will be similar but targeted to a difference audience (small businesses, Environmental Justice stakeholders and tribes). Both webinars will be held on Wednesday, June 23, click the links below to register:

- 3:00 – 4:00pm EDT: [Communities/Environmental Justice Stakeholders/Tribes](#)
- 4:00 – 5:00pm EDT: [Small Business Stakeholders](#)

The Administrator signed an Advance Notice of Proposed Rulemaking (ANPRM) related to adding 1-bromopropane (1-BP) to the Clean Act Act's list of hazardous air pollutants (HAP).

The EPA intends to add 1-BP to the HAP list by the end of 2021. This would be the first time that EPA has added a pollutant to the HAP list since the list was created by the 1990 Clean Air Act amendments. This chemical is largely used in solvent degreasing and in adhesives, furniture foam fabrication, and surface coatings applications such as in the aerospace manufacturing. EPA is soliciting data and information on 1-BP usage, emission controls, and costs to inform the process to address the implementation of the upcoming listing action and to ensure that the regulatory infrastructure is in place to control the emissions of 1-BP. The EPA is publishing an ANPRM to solicit comments and data from the public on topics related to adding 1-BP to the Clean Air Act's HAP list. The Agency also requests information on potential impacts to small businesses, as well as potential impacts on Tribal and environmental justice communities. A pre-publication version of the ANPRM and a fact sheet are available on the [web](#).

EPA Tools & Resources Webinar: Community Exposure for COVID

Wednesday, June 16; 3-4 pm EST / [Register Here](#)

EPA researchers have been working on a variety of projects to learn more about SARS-CoV-2, the virus that causes COVID-19, to help states, tribes and communities make sound public health decisions. This webinar will discuss research that sheds light on community exposure of SARS-CoV-2, including virus detection in wastewater, standardized methods for quantifying the virus in

wastewater, development of salivary antibody assays, and transmission of the virus through airborne particles.

The U.S. Environmental Protection Agency (EPA) is taking the first step to develop a proposed rule to reduce methane and other harmful pollutants from new and existing sources in the oil and natural gas industry, beginning with a broad public outreach effort to gather community and stakeholder input.

These activities include opening a public docket for pre-proposal comments, holding training sessions on the rulemaking process and how to participate in it, and convening listening sessions for stakeholders. These actions are a part of our response to a directive in Executive Order 13990, “[Protecting Public Health and the Environment and Restoring Science to Tackle the Climate Crisis](#).” See the information below on how to participate.

Submit your input in writing to EPA’s public docket. EPA has opened a docket for members of the public to submit input to the Agency in writing. To submit your input online, visit this [website](#). Identify your comments by **Docket ID No. EPA-HQ-OAR-2021-0295**. For more information on submitting information to EPA dockets, visit [here](#).

NOTE: This is not the docket for the proposed rulemaking. EPA will open a separate regulatory docket when it issues the proposal in September.

Attend a Public Listening Session

EPA will hold public listening sessions from noon to **9 p.m. EDT** each day **Tuesday, June 15 through Thursday, June 17**. Each day will focus on different stakeholder groups; however, you may register to speak on any day:

- **Tuesday, June 15, 2021:** Focus on Industry and Non-Governmental Organizations
- **Wednesday, June 16, 2021:** Focus on Communities, Environmental Justice Stakeholders and Tribes
- **Thursday, June 17, 2021:** Focus on States, Local Governments and Small Businesses

You may register to speak on any day, even if the focus is not on your stakeholder group. Follow [this link to register to speak](#) at a public listening session. ***The deadline to register for the listening sessions is Friday, June 11, 2021.***

GAP Guidance Next Steps

The Indian Environmental General Assistance Program, or GAP, is the largest tribal capacity building program in EPA. Since its inception in 1992, GAP has been a primary source of non-competitive, consistent funding for tribes to address multi-media capacity building and solid and hazardous waste implementation needs. The efficient, effective, and flexible administration of GAP is a shared priority for tribes as well as EPA.

EPA is moving forward with finalizing revisions to the GAP Guidance. The EPA American Indian Environmental Office (AIEO) in the Office of International and Tribal Affairs (OITA) has scheduled two national webinars in June to share our progress and discuss next steps. The webinars are scheduled as follows:

- **Webinar #1: June 24/2-3:30 Eastern Time**
 - TEAMS video conference link: [Click here to join the meeting](#) at the appropriate time
 - Dial-In Option (Audio Only) Number:
 - [+1 202-991-0477,,394915343#](#) United States, Washington DC
 - Phone Conference ID: 394 915 343#
 - To find a local dial-in number, [Find a local number](#).
- **Tribal Webinar #2: June 29/2-3:30 Eastern Time**
 - TEAMS video conference link: [Click here to join the meeting](#) here at the appropriate time
 - Dial-In Option (Audio Only) Number:
 - [+1 202-991-0477,,928337418#](#) United States, Washington DC
 - Phone Conference ID: 928 337 418#
 - To find a local dial-in number, [Find a local number](#).

NIH-EPA Environmental Health Disparities Research Webinar Series

The [NIH-EPA Environmental Health Disparities Research Centers of Excellence Program](#) is hosting this webinar series to highlight the research, training, and community-engagement accomplishments at the Centers collaboratively funded by the National Institute of Environmental Health Sciences (NIEHS), National Institute of Minority Health and Health Disparities (NIMHD), and the U.S. Environmental Protection Agency (EPA). Furthermore, the webinar series is intended to raise awareness of, and prompt dialogue on, opportunities to examine and address environmental contributions to health disparities. The webinars are open to anyone interested in learning more about environmental health disparities and strategies to reduce them. **Schedule:**

- *June 28, 2021 – [Exposure Pathways & Environmental Health Disparities](#)*
All webinars in the series will be held live via Zoom on Mondays 3-4:30pm EST

NTAA Upcoming Calls

The toll-free number is 1-800-309-2350. If you do not need to call toll free, or would like to help conserve NTAA funding, you can call 1-805-309-2350. Both numbers use code 928-523-0526#. Contact Andy.Bessler@nau.edu if you have any questions about any call! ***Registration instructions*** When you register for the GoToWebinar, please remember to include your Tribe, Region, or Organization in parenthesis after your last name. This allows you to see everyone on the call and prevents us from conducting a roll-call, ultimately saving everyone's time.

Indoor Air Quality Work Group: Join this work group every other month to help support IAQ work throughout Indian Country.	Thursday, June 17, 2pm ET
EPA Policy Call: Call in to hear updates from EPA on policies, actions, and tools relevant to Indian Country and Air Quality. <i>NOTE TIME CHANGE</i>	Thursday, June 24, 1pm ET
Mobile Sources Work Group: This monthly work group addresses all mobile source pollution issues.	Thursday, July 1, 2pm ET
Wood Smoke Work Group: Join this work group every other month to address wood smoke issues in Indian Country.	Thursday, July 22, 1pm ET

The Institute for Tribal Environmental Professional (ITEP)

[Click here](#) for ITEP's new Tribal Environmental Management and Planning Online Courses. Sign up for a self-paced course hosted by ITEP's Waste and Response and Tribal Air Quality programs. New courses have been added, so check it out!

ITEP's American Indian Air Quality Training Program (AIAQTP) hosts the Building Performance: Improving IAQ in Cold Climates, Residential Building Science Review, Radon Fundamentals, Quality Assurance Fundamental, Writing a Quality Assurance Project Plan, Emissions Inventory Fundamentals, and Emissions Inventory Advanced.

[AIAQTP Schedule and Registration](#)

Training Title	2021 Dates	Training Type
Quality Assurance Project Plans in a Nutshell	June 1	Webinar
Wildland Smoke and Community Preparedness	June 7-11	Virtual Training

Recorded Webinars

Looking for more information check out the [Tribal Air Quality Media Space Channel](#). Recent webinars include an Introduction to Air Quality Programs, Emissions Inventories, Remote Professional Assistance, and Woodstoves in Indian Country. Older classics include a series on Air Quality Planning for Wildland Smoke, Tribal Air Program and Grants, Data Management, and the Clean Air Act.

ITEP's [Tribes and Climate Change Calendar](#) includes conferences, trainings, webinars, and other events related to tribes and climate change.

Climate Change / Energy

NEW! EPA's Climate Change Indicators in the United States: EPA's newly updated website, *Climate Change Indicators in the United States*, looks at changes to our health and the environment related to the causes and effects of climate change. With new science, additional indicators, and more years of data, many of these signs of climate change have become even more evident, stronger, and extreme. Explore the website: <https://www.epa.gov/climate-indicators>.

You are invited to participate in two upcoming webinars on the resource. On June 17, EPA will provide an Overview of EPA's Climate Change Indicators. The presentation will provide key findings, highlight several indicators, and describe ways to explore, share and use the information including interactive data tools and story maps. A second webinar on June 24 will focus on Climate and Heat: Trends, Health Impacts and Risk. This one-hour webinar will feature climate-related temperature trends particularly related to extreme heat and urban heat, human health effects, social vulnerability, and risks (happening now and looking into the future). Visit EPA's State, Local, and Tribal Webinar Series webpage to register: <https://www.epa.gov/statelocalenergy/state-local-and-tribal-webinar-series>.

Request for Proposals: Seed Funding for Centering Justice in Climate Research & Action

Due: Friday, June 25; @midnight | [View Application Here](#)

The [Rising Voices Center for Indigenous and Earth Sciences](#) is offering three \$5,000 awards to launch small-scale but impactful projects OR to support the time and effort to write a proposal for a large-scale project. Applications must demonstrate how the proposed work will bring together Indigenous and Earth sciences to address pressing community-driven research and action. Successful applications will support projects to begin around July 20, 2021 and conclude around November 20, 2021. If you have any questions about the solicitation or application process, please send an email to RisingVoicesinAction@gmail.com

Office of Air and Radiation Update: Proposed Rule “Phasedown of Hydrofluorocarbons: Establishing the Allowance Allocation and Trading Program under the American Innovation and Manufacturing Act”

Hydrofluorocarbons (HFCs) are potent greenhouse gases commonly used in refrigerators, stationery and motor vehicle air conditioners, and many other applications. On April 30th, the U.S. Environmental Protection Agency (EPA)

proposed the first regulation under the American Innovation and Manufacturing (AIM) Act of 2020, which requires the United States to phase down production and consumption of HFCs by 85% over the next 15 years by using an allowance allocation and trading program.

EPA is seeking public comment on this proposed rule, which would set the HFC production and consumption baseline levels from which reductions will be made, establish an initial methodology for allocating HFC allowances for 2022 and 2023, and create a robust and innovative compliance and enforcement system.

Companies that produce, import, export, destroy, or use HFCs in equipment may be interested in submitting data or commenting. More information on HFCs and the proposed rule can be found [here](#). The public comment period for the proposal will be open for 45 days after publication in the Federal Register.

ITEP's Climate Change Adaptation Training Courses registration is online!

Toxics/Mobile Sources

NTAA produced a [Policy Resource Kit](#) to help Tribes respond to EPA on its reconsideration of the 2019 action titled, the “Safer Affordable Fuel-Efficient Vehicles Rule,” for the purposes of rescinding the action taken by the prior administration. [NTAA commented on the full SAFE proposal](#), which included both the waiver withdrawal and the freezing of fuel efficiency standards, on October 26, 2018. This Reconsideration seeks comment on:

- Appropriateness of EPA’s interpretations that led to the withdrawal of CA’s CAA waiver to set GHG standards and a ZEV sales mandate
- Appropriateness of EPA’s interpretation that disallowed other states to adopt CA GHG emission standards

NTAA’s PRK includes [a fact sheet](#) and NTAA will be preparing a template letter for Tribes to use in submitting their own comments. The comment deadline is July 6, 2021. You can find more information and to comment, visit the [Federal Register website](#).

EPA’s Diesel Emissions Reduction Act’s Tribal Grants for FY21

Request for Applications now open! More information can be found on this [flyer](#) and on [this website](#). EPA’s 2021 Tribal and Insular Area grant program is now open. EPA anticipates awarding approximately \$5 million in DERA funding under this announcement. A total of \$4.5 million will be made available to tribal governments (or intertribal consortia) and Alaska Native villages, and \$500,000 will be made available to insular area governments. EPA anticipates awarding five to ten cooperative agreements to tribal governments (or intertribal consortia) and

Alaska Native villages and two to four cooperative agreements to insular area governments. Click [here](#) for more information.

The U.S. EPA is in the process of conducting a residual risk and technology review of the 2002 National Emission Standards for Hazardous Air Pollutants (NESHAP) for Major Source Primary Copper Smelting and a technology review of the 2007 Primary Copper Smelting Area Sources NESHAP.

After EPA publishes the rules in the *Federal Register*, EPA plans to accept comment on these proposals for at least 45 days after publication in the *Federal Register*. Interested parties can download additional information and a copy of the proposed rules (when they are officially issued by EPA) from [EPA's website](#) and this [website](#). The proposed rules and other background information will also be available either electronically [here](#), EPA's electronic public docket and comment system. Materials for the proposed actions can be accessed using **Docket ID No. EPA-HQ-OAR-2020-0430**. For further technical information about the rule, contact Tonisha Dawson, EPA's Office of Air Quality Planning and Standards, at (919) 541-1454 or dawson.tonisha@epa.gov.

The U.S. EPA Office of Chemical Safety and Pollution Prevention (OCSPP) is initiating consultation and coordination with federally-recognized tribes regarding development of proposed actions under section 6(a) of the Toxic Substances Control Act (TSCA) to address the unreasonable risks that EPA has determined are presented by n-methylpyrrolidone (NMP) under its conditions of use.

This consultation and coordination process will be conducted in accordance with the [EPA Policy on Consultation and Coordination with Indian Tribes](#). EPA invites you and/or your designated consultation representative(s) to participate in this process. OCSPP's anticipated timeline for the consultation and coordination period is expected to extend from May 24 to August 27, 2021. During this period, two identical consultation sessions will be conducted. To participate, OCSPP invites you and/or your designee to join us during one or more of the following consultation sessions:

- **Wednesday, July 14, 2021, Tribal Consultation 2** – Technical Briefing and Comment Period from 1:00-3:30pm (ET) Conference Line: (833) 760-4028; Conference ID: 7686356 [Adobe Connect Link](#).

To learn more about the rulemaking for NMP, visit this [link](#).

Green Transportation Summit & Expo

August 16-18, 2021 Tacoma, Washington / [Registration](#)

The 10th annual Green Transportation Summit & Expo (GTSE) is the region's premier clean transportation convening event. There has not been a time when

clean transportation has had as much potential. With this year's theme of Reflecting + Refocusing on a Resilient Future, we are giving particular attention to recent events affecting our communities and livelihood. We will be creating space to ensure these critical topics are addressed. **All Tribes can get a 20% discount, contact Dara.Marks-Marino@nau.edu for the code!**

Office of Pesticide Program Update: EPA Opens Comment Period on Draft Biological Opinion on Malathion, Closes June 19, 2021

The U.S. Environmental Protection Agency (EPA) is seeking public comment on the U.S. Fish and Wildlife Service's (FWS) [draft biological opinion for the registration of malathion](#), an insecticide that is commonly used to control mosquitoes and a variety of insects that attack fruits, vegetables, landscaping plants, and shrubs. The draft biological opinion evaluates whether use of malathion is likely to jeopardize federally threatened and endangered species or destroy or adversely modify their critical habitats.

In January 2017, EPA released the [biological evaluation for malathion](#), which found potential effects on threatened and endangered species and their designated critical habitats. Because the biological evaluation for malathion made "likely to adversely affect" determinations to some threatened and endangered species and their designated critical habitats, EPA has been consulting with FWS to ensure the registration of malathion is not likely to jeopardize the continued existence of these species or adversely modify their critical habitats. The public comment period will be open for 60 days and will close on June 19, 2021. The draft biological opinion is included in docket EPA-HQ-OPP-2021-0231 at www.regulations.gov.

The recent additions to OTAQ's website in June 2021. [*You can access these additions as well as new press releases and Federal Register notices related to OTAQ on our website.*](#)

- June 8, 2021: [EPA releases the annual Fast Facts document that provides information about U.S. transportation sector greenhouse gas emissions \(1990-2019\).](#)

The recent additions to OTAQ's website are listed here. [*You can access these additions as well as new press releases and Federal Register notices related to OTAQ on our website.*](#)

Indoor Air Quality

Navigating the Landscape of Air Cleaning Technologies for COVID-19
Wednesday, June 16; 1-3pm EDT / [Register Here](#)

The global COVID-19 pandemic has prompted widespread demand for air cleaning technologies aimed at reducing risks of airborne infectious disease transmission inside buildings. Along with increased ventilation, portable and in-duct air cleaners are increasingly being recommended as part of a layered approach to reduce exposures to SARS-CoV-2 in airborne particles. In this webinar we will help navigate the landscape of commercially available air cleaning technologies, provide insight on how to interpret air cleaner test reports, and provide recommendations and tools for selection, evaluation, and sizing of portable and in-duct air cleaners.

NEW! Radon Webinar Series: Radon and Citizen Science: Public Engagement to Increase Education and Outreach

Tuesday, June 22; 2-3pm ET / [Register Here](#)

Reducing exposure to radon is an important component in preventing lung cancer. Radon, a radioactive gas, is one of the most hazardous indoor pollutants. This naturally occurring gas is the leading cause of lung cancer among non-smokers, responsible for more than 21,000 annual deaths. According to the US EPA, radon concentrations above its action level are present in 1 of 15 buildings in the United States.

During this webinar, subject matter experts will share guidance, lessons learned, and best practices for increasing radon education and outreach through public engagement opportunities created by citizen science projects. Register today to reserve your seat!

The Conference of Radiation Control Program Directors (CRCPD) and the American Association of Radon Scientists and Technologists (AARST) Foundation Webinar Series:

- National Radon Action Month: Best Practices for State and Tribal Radon Programs – *July 22, 2:00-3:00 p.m. EST*
- The sixth webinar on a trending topic to be announced will be scheduled for the month of August – *stay tuned*

How Indoor airPLUS Homes Help Reduce the Occurrence of Asthma Triggers in the Home

Here are ways an Indoor airPLUS home can help reduce [asthma triggers](#) in the home.

Be sure to subscribe to [CodeTalk](#), HUD's Office of Native American Programs newsletter, for webinars and opportunities!
