NTAA NEWS!

Intermediate

Job Description:

This position reports to the Program Manager of ITEP's National Tribal Air Association. It is preferred the position be based in Flagstaff, AZ, with a remote or hybrid work option available as needed. Key responsibilities include: Project Coordination, Administrative and Logistical Support, Data Collection and Reporting, and more.

Visit: https://in.nau.edu/humanresources/current-job-openings/ To Apply Online

- Full time, benefits eligible
- Anticipated salary range is \$41,421 -
- \$51,776. Annual salary DOE
- Job ID 607736.

Interested in applying? <u>Click here</u> for more information about the Program Coordinator Position with the National Tribal Air Association! Email <u>carolyn.kelly@nau.edu</u> with any questions.

Join us in the beautiful Smoky Mountains of Cherokee, North Carolina on May 6 – 9, 2024 for the 24th Annual National Tribal Forum on Air Quality.

This year's conference includes:

- Over 45 breakout sessions, field trips, trainings on air quality topics ranging from grants, policy & regulations, indoor air quality, community education, ambient air monitoring, and much more.
 - Click <u>HERE</u> for an overview of the conference & detailed agenda.
- ➤ Three excellent <u>Educational Tours & Field Trips</u> to choose from
- Eight pre-conference training sessions
- ➢ 2nd annual NTFAQ <u>Film Festival</u>
- NTAA Annual Membership Meeting and Luncheon
- Virgil Masayesva Environmental Excellence Award
- Breath of Fresh Air Community Fun Run & Walk
- **Lodging information is now available <u>here</u>!

If you cannot join us in-person for the 2024 NTFAQ, we will be recording our sessions and will make them available on our website after the conference.

Special thanks to our host Tribe the **Eastern Band of Cherokee Indians**! Check out <u>this article</u> for a sneak peak of the excellent work the Tribe is doing to protect and improve air quality for their community.

We look forward to seeing you in Cherokee, North Carolina! For questions, please contact us at <u>NTFAQ@nau.edu</u>

Call is open for new films for this year's 2nd Annual Film Festival! Email <u>lauradmckelvey@gmail.com</u> with any questions and submissions!

To Register for the 2024 EPA Tri-Regional Radon Stakeholders Meeting: https://bit.ly/3tfT5ud

Join ITEP staff for various Office Hours to ask questions and learn more about pertinent air quality and monitoring issues using this <u>Zoom Link</u>.

TRIBAL HOME ENERGY REBATES

Up to \$225M for Home Electrification and Appliance Rebates -- provides up to \$14,000 per household for energy efficiency and electrification home upgrades.

Qualified Projects Include:

- HVAC: Electric heat pumps for water heating and space heating or cooling
- · Cooking: Electric stoves, cooktops, ovens
- Laundry: Heat pump clothes dryer
- **Building Materials:** Electric Load Service Center, Insulation, Air Sealing, and Ventilation

Deadline: May 31, 2025

NTAA Upcoming Calls

Contact <u>Carolyn.Kelly@nau.edu</u> if you have any questions about any calls. A Zoom link will be sent with calendar invites for future NTAA work group calls.

Woodsmoke Work Group: This work group meets Bi-Monthly and includes Tribal and EPA professionals with an interest in woodsmoke issues in Tribal communities. Contact <u>Carolyn.Kelly@nau.edu</u> to join the call!	TBD, 10 am AK or 2 pm ET
Clean Transportation Bimonthly Roundtable Calls: The MSWG will no longer be having calls. Instead, the Tribal Clean Transportation Program (TCTP) will be the go-to source of all information related to Clean Transportation. Roundtable calls will be held bi-monthly on the first Wednesday of the month. Also, be on the lookout for EPA OTAQ information presented during the monthly NTAA/EPA Policy Calls as the information is relevant and timely. For more information, email <u>Heather.Bartlett@nau.edu</u>	<mark>April 3</mark> , 10 am AK or 2 pm ET
Alaska Air Work Group: Join this work group to hear updates from EPA and Alaskans working on air quality. Contact <u>Carolyn.Kelly@nau.edu</u> to join the call!	Wednesday, May 29, 10 am AK or 2 pm ET
NTAA / EPA Air Policy Update Call: Join this monthly meeting to hear updates from EPA on important air quality and climate policy updates as well as updates around the country related to Tribal Air Programs. Calls are held on the last Thursday of every month unless it falls on a holiday. Contact <u>Carolyn.Kelly@nau.edu</u> to join the call!	Thursday, April 25, 10 am AK or 2 pm ET
Indoor Air Quality (IAQ) Office Hours: The IAQ WG is teaming up with ITEP's IAQ Office hours with Mansel Nelson. Please join us for ITEP's next IAQ office hours, we would love to have you there!	

The Institute for Tribal Environmental Professionals (ITEP)

ITEP's American Indian Air Quality Training Program (AIAQTP): <u>AIAQTP Schedule</u> and Zoom Link

ITEP Grants Office Hours: April 3, from 9-10 AM Alaska, 10-11 AM Pacific, 11-12 PM Mountain, 12-1 PM Central, 1-2 PM Eastern. Bring your grant questions and concerns. Join Zoom Meeting: Meeting ID: 659 096 3943 Password: AIAQTP

TAMS Air Monitoring Workgroup Meeting: April 16, 11:00 AM Pacific Time

This Workgroup is an opportunity for Tribes to discuss concerns and issues regarding air monitoring programs and projects together and to learn about available equipment for loan and more. Join Zoom Meeting: Meeting ID: 659 096 3943 Password: AIAQTP

Ambient Air Quality/EPA/NTAA/Tribes

NEW! DOE is holding a webinar on their \$225M *Tribal Home Electrification and Appliance Rebate Program* this Thursday, April 4 at 3 PM EST.

If a federally recognized tribe applies, they can receive Home Energy Rebate Program funds (many tribes can receive **over a million dollars**) to help tribal members with weatherizing their homes, purchasing efficient electric heat pumps for space heating and cooling and electrical upgrades etc. See potential benefits below.

The rebates are "point of sale" rebates up to \$14,000/households (\$8K for heat pumps) and could **help improve air quality,** both indoors and out and the **comfort, health, and safety** of tribal households. We encourage you to **share** this webinar with your **tribal housing**, HUD or realty programs and **energy programs**.

What: Tribal Home Electrification and Appliance Rebates Program Requirements Overview Webinar

Come learn about the program and requirements for the \$225 million DOE Home Electrification and Appliance Rebates Program for Indian Tribes. This webinar is only open to Tribal Leaders and Tribal Representatives from Tribal Governments and Alaska Native Corporations.

When: Thursday, April 4 at 3 p.m. Eastern Where: Register here à Webinar Registration - Zoom (zoomgov.com) Learn more about the Tribal Home Energy Rebates program here.

<u>Applications</u> are due May 31, 2024. This <u>link</u> provides funding allocation for each tribe.

Potential Benefits of Tribal Home Electrification and Appliance Rebate Program Benefits of installing heat pumps:

- Efficient space heating, resulting in lower household energy bills if heating with electric baseboard, propane, kerosene or paying for wood.
- Efficient cooling, especially critical in areas where people have not historically needed air conditioning but are now experiencing extreme heat events, reducing heat-related illness and death, especially in vulnerable people.
- Although ductless heat pumps won't typically purify the indoor air impacted by wildfire smoke, the cooling they offer allows homeowners to keep windows closed and reduce indoor exposure of smoke, while maintaining a comfortable indoor air temperature
- Introduces options to use wood stoves only during power outages or extreme cold and greatly lesson the physical effort on elders to split, stack and haul firewood.

Benefits of weatherizing homes (sealing gaps, cracks and openings; adding insulation):

- Lowers household energy bills
- Results in more even temperature -- more comfortable year round
- Reduces entry of outdoor air pollution (like wildfire smoke)
- Controls moisture levels in the house and reduce chances of mold or mildew issues

NEW! Desk statement on Nonregulatory Public Docket: Reducing Greenhouse Gas Emissions from Existing Gas Turbines at Power Plants

As part of EPA's strategy to pursue a suite of rulemakings to address greenhouse gas (GHG) emissions, air toxics, and emissions of nitrogen oxides from the power sector, on February 29 Administrator Michael Regan announced a new, comprehensive approach to reduce GHG

emissions from the entire fleet of natural gas-fired turbines, as well as to set protective standards for toxic and criteria air pollution.

On March 26, 2024, EPA opened a non-regulatory docket and issued framing questions to gather input about ways we can design a stronger, more durable approach to greenhouse gas regulation of the entire fleet of existing gas combustion turbines in the power sector under Clean Air Act Section 111(d). EPA is committed to expeditiously proposing this and the other elements of a comprehensive approach to regulation of climate, toxic and air pollution from combustion turbines. Engagement over the next several months will be essential to shaping new proposals that protect communities, public health, and the environment. EPA is pursuing a robust stakeholder engagement process, consulting with energy workers, communities with environmental justice concerns, environmental justice leaders, industry, grid operators, and all interested parties to help develop these proposals. The non-regulatory docket will be open for public Comment for 60 days – through May 28, 2024. Details are available at <u>Nonregulatory Public Docket: Reducing Greenhouse Gas Emissions from Existing Gas Turbines at Power Plants</u>

EPA plans to re-propose emission guidelines for existing electric generating unit (EGU) combustion turbines to address GHG emissions more comprehensively from this subcategory, achieving greater emission reductions and addressing the broad range of concerns stakeholders have raised. EPA welcomes input from states and all stakeholders that may inform the Agency's approach and assist in the development of this proposed rule. EPA also plans to hold a policy forum at EPA headquarters in Washington, D.C., on May 17th to bring stakeholders together to share ideas with EPA and each other on these issues. More details about the policy forum, and registration information, will be available in mid-April.

REMINDER! EPA Administrator Regan and USAID Administrator Power Formalize Partnership to Advance Environmental Protection Around the World

WASHINGTON – March 26, U.S. Environmental Protection Agency Administrator Michael S. Regan and U.S. Agency for International Development Administrator Samantha Power signed a Memorandum of Understanding (MOU) that formalizes the leaders' joint commitment to cooperate in tackling the challenges of climate change, air and water pollution, lead poisoning, and recycling of materials from plastics and electronic waste, and encouraging the responsible management of critical minerals. The meeting occurred after Administrator Regan's recent Mission to Africa where he reinforced EPA's commitment to partner with leaders, young people, and advocates to address many of these same challenges.

"EPA greatly values our long history of environmental cooperation with USAID," said EPA Administrator Michael S. Regan. "Administrator Power is a true champion for environmental protection across the world. Under her leadership, EPA is proud to work alongside USAID to work with developing countries to achieve high public health standards, strengthen environmental governance, and advance the values of environmental justice and equity." Globally, approximately 1 in 3 children have elevated blood lead levels, and lead poisoning kills at least 1.6 million people each year with the vast majority of these deaths in low- and middleincome countries. Administrator Power is advocating for a global drive to support low- and middle-income countries in rolling out and enforcing binding regulations to curtail lead in consumer goods like paint, spices, and cosmetics. In January, USAID joined EPA in supporting the global partnership to eliminate lead paint.

Administrator Regan recently returned from Africa, where he met with national leaders, young people and advocates to develop shared solutions to environmental challenges, including air and water pollution, management of plastic waste and electronic waste recycling. EPA will be working with USAID to share appropriate U.S. best practices in low- and medium-income countries.

Another shared priority is the responsible and sustainable management of critical minerals. As the world transitions to green energy sources and we scale clean energy supply chains, demand for critical minerals that power these technologies could benefit millions through inclusive, sustainable economic growth, if mined responsibly. EPA and USAID are collaborating to advance strong standards and safeguards for the sustainable mining of critical minerals around the world.

EPA and USAID have a history of effective collaboration on some of the world's biggest environmental issues. Together, USAID and EPA are ready to build on our history of collaboration, bringing together EPA's wealth of knowledge and technical expertise and USAID's international leadership and in-country presence and programs to build capacity to protect health and the environment and advance a freer and more equitable world. For further information: press@epa.gov

REMINDER! Announcing EPA's final *Multi-Pollutant Emissions Standards for Model Years* 2027 and Later Light-Duty and Medium-Duty Vehicles rule. The final rule establishes new, more protective federal standards for greenhouse gas emissions and smog- and soot-forming ("criteria pollutant") emissions for light- and medium-duty vehicles, for model years 2027 and later.

More information will be available on https://www.epa.gov/ shortly!

REMINDER! SUBJECT: Section 184 Indian Housing Loan Guarantee Program – Final Rule Published in the Federal Register

Today, March 20, 2024, the U.S. Department of Housing and Urban Development (HUD) published the final rule on the Section 184 Indian Housing Loan Guarantee (Section 184) program in the Federal Register. A link to the final rule is <u>here</u>. The final rule expands and revises the Section 184 program regulations to address the program's growing demands, increase transparency and accountability, and strengthen the program to ensure that it remains viable for many years to come.

The final rule strengthens and modernizes the Section 184 program by:

- Codifying current practices, policies and procedures, and adopts relevant industry standards;
- Incorporating Tribal comments received during Tribal consultation and the proposed rule public comment period;
- Setting expectations for Lenders and Servicers and providing an explicit framework within which Lenders and Servicers must operate;
- Enhancing safeguards for Native American borrowers and increasing partnership opportunities with Tribes; and
- Addressing program weaknesses identified by the Office of the Inspector General.

Overall, HUD conducted 28 Tribal Consultations on the rule. These consultations began before HUD started drafting the rule and continued through the public comment period on the proposed rule, which was published on December 21, 2022. The final rule reflects public comments received during this period.

Thank you to all the Tribal leaders and housing practitioners who participated in Tribal consultations and submitted comments on the rule. Your input was essential in developing the best possible regulations for the Section 184 program. The final rule has a 90-day implementation period, during which time HUD will be drafting the handbook implementing the

final rule. HUD anticipates sharing draft chapters of the handbook to Tribal stakeholders in advance of publication and will provide training to Tribes and Lenders, as appropriate. Thank you for your continued partnership and collaboration in the effective delivery of HUD's programs. <u>View Document Here</u>

REMINDER! Join the TCTAC Network News <u>HERE</u>!

With this monthly internal newsletter, we will send you updates on our projects, share spotlights of the great work being done across the country, reminders for program events, and whatever else you may need.

REMINDER! Procurement, Subawards, and Participant Support Costs Webinar

The EPA Procurement, Subawards, and Participant Support Costs Webinar will be held on Wednesday, March 27, from 11:30 am - 1:00 pm ET. This webinar will cover procurement regulations and requirements. Specific topics include: best practices for contracts, consultants, equipment, and supply purchases; review of subawards (grant awards provided by a pass-through entity to a subrecipient); and participant support costs (payments to individuals who participate in grant activities but are not employees of the grant recipient). Participants will be able to ask questions of EPA presenters during the webinar. Advance registration is required. <u>Click here to register</u>. Please be aware that if you registered previously, the webinar has been extended and will now end at 1:00 pm ET.

Presentation materials and a list of helpful links will be available on EPA's website before the webinar: <u>https://www.epa.gov/grants/procurement-subawards-and-participant-support-costs-webinar-march-27-2024</u>. After the webinar, a recording will be posted to the same webpage.

REMINDER! The EPA OAQPS AirKnowledge team is pleased to announce the availability of new AirKnowledge air quality training materials!

The new materials include:

- A self-instructional course that describes the components of an exceptional events demonstration,
- A self-instructional module that identifies resources and tools that aid in protecting human health from wildland fire smoke, and
- A self-instructional module that explains the key aspects of the historical background of the Clean Air Act permitting programs.

More detailed information about the contents of these new materials can be found in the attached document.

We are also announcing the retirement of certain legacy course materials. These include the classroom course titled MACT Background Information (NACT 290), and e-learning modules titled Emissions Inventories, Fabric Filtration, and Overview of Air Pollution.

The new e-learning course and modules are available to tribal, state, and local air agencies through the AirKnowledge Learning Management System (LMS) at

<u>https://epaapti.csod.com/client/epaapti/default.aspx</u>. To access the course and modules on the LMS, tribal, state and local air agencies and tribal and multijurisdictional organizations can register, log in, and refer to the "What's New" section on the home page. The materials are available to all other users on the AirKnowledge website: <u>airknowledge.gov</u>. Questions and comments are always welcome and may be sent to <u>airknowledge@epa.gov</u>.

REMINDER! Enhancing Wildfire Smoke Preparedness in Oregon Schools and Childcare Centers

WHEN: Thursday, April 11th | 9:00am - 4:00pm WHERE: In-Person: Oregon State University, Memorial Union, Room 109, Corvallis, OR 97331 Virtual: Zoom: https://oregonstate.zoom.us/j/91037712435?pwd=ZHU3YW9qejlyT2JIYIFIS1ZRTkNrdz09

REMINDER! Annual Smoke Management in the NW Conference June 11-13, Seattle, WA and virtual

Registration

The conference gives air quality, land management, public health, academia, community, and other professionals to collaborate on wildfire smoke and related issues. Includes information and discussion on the latest policies, tools, resources, and smoke management approaches.

REMINDER! EPA releases 2023 update to Equity Action Plan

The U.S. Environmental Protection Agency on February 14th released the 2023 update to its Equity Action Plan, as part of the Biden-Harris Administration's whole-of-government equity agenda. This Equity Action Plan is part of EPA's efforts to implement the President's Executive Order on "Further Advancing Racial Equity and Support for Underserved Communities Through The Federal Government," which reaffirmed the Administration's commitment to ensure equity and build an America in which all can participate, prosper, and reach their full potential.

"Equity is at the heart of all that we do at EPA. Striving for equity makes it possible for us to deliver on our mission to protect public health and provide a clean environment for all," said **EPA Deputy Administrator Janet McCabe.** "The progress that we have made and this update to our Equity Action Plan show our continued commitment to uplifting everyone, and we are proud to be a part of this work."

Following robust engagement with community stakeholders, EPA identified eight priority strategies, which include four previously identified priorities carried forward from the 2022 Equity Action Plan and four newly identified strategies to support communities that have been historically underserved, as well as all communities across our Nation, these eight priority strategies are:

- Improve access for Communities to Federal Assistance.
- Reduce Cumulative Impacts and Health Disparities.
- Strengthen our Civil Rights Compliance Program.
- Protect Children from Exposures to Environmental Harms.
- Address Inequitable Access to Resources for Rural Communities.
- Ensure Public Access to EPA Programs and Address Environmental Harms for People with Disabilities.
- Strengthening Community-Based Participatory Science to Achieve Environmental Equity.
- Improve Data and Analytic Capacity to Better Identify and Remove Barriers.

As the backbone of work at EPA under the Biden-Harris Administration, the focus remains on ensuring no one is left behind because of the color of their skin or the zip code where they reside.

As this work continues, updates will be posted on <u>EPA's Equity Action Plan webpage</u>. Learn more about the <u>Administration's equity work</u> and check out all <u>Federal Equity Action Plans</u>.

For up-to-date information about Environmental Justice funding opportunities, events, and webinars, subscribe to EPA's Environmental Justice listserv by sending a blank email to: join-epa-ej@lists.epa.gov. Follow us on Twitter: @EPAEnvJustice

REMINDER! The National Transportation in Indian Country Conference (NTICC) invites you to apply for their <u>call for presentations</u>. The 2024 NTICC Planning Committee is now accepting proposals for the 27th Annual NTICC. If you would like to submit a proposal, complete the form. The 2024 NTICC is an in-person event, set for August 25, 2024, at the Choctaw Casino & Resort. Please review the call for presentation information at <u>https://www.nticc.org/call-for-presentations</u> prior to completing this form.

REMINDER! More than \$80 million in Grants Available -- Air Monitoring Direct Awards to State, Local, Tribal, and Territorial Air Agencies

On February 16, 2024, EPA announced the availability of approximately \$81 million in noncompetitive, direct award funding from the Inflation Reduction Act of 2022 (IRA) for eligible state, local, Tribal, and territorial air agencies to establish new ambient air monitoring sites, and maintain, operate, or upgrade existing ambient air monitoring networks. The networks provide data to inform decision making that protects human health and the environment. The deadline for eligible air agencies to apply is April 8, 2024. These one-time supplemental funds will provide critical resources for our nation's ambient air monitoring networks.

Approximately \$2 million of funding is also available to support the deployment and operation of air quality sensors in low-income and disadvantaged communities across the United States. EPA's grant guidance documents that outline the specific details, timelines, applicant eligibility criteria, and eligible activities relating to this funding opportunity are available at: https://www.epa.gov/grants/air-grants-and-funding.

Who is eligible for this funding opportunity?

Air pollution control agencies currently involved in air monitoring activities that regularly receive Clean Air Act section 103 or 105 grants either annually or every few years.

What activities are eligible?

Detailed information on eligible activities is available in the grant guidance documents. For IRA sections 60105 (a) and (b), generally, these include activities related to establishing new air monitoring stations or in maintaining, operating, or upgrading existing monitoring stations. For IRA section 60105 (c), generally, these include activities supporting the deployment, integration, and operation of air sensors in low-income and disadvantaged communities.

What is the period of performance for these grants?

The maximum period of performance for these grants is up to five years. The period of performance should be based on the time required to accomplish the workplan components.

REMINDER! EPA and DOE announce intent to fund projects to reduce methane emissions from the oil and natural gas sectors

The U.S. Environmental Protection Agency (EPA) and the U.S. Department of Energy (DOE) announced a Notice of Intent (NOI) on February 9, 2024 to make funds available to help measure and reduce methane emissions from the oil and gas sectors as part of President Biden's <u>Investing in America agenda</u>. Methane is a climate "super pollutant" that is more potent than carbon dioxide and responsible for approximately one third of the warming from greenhouse gases occurring today.

If released, the corresponding funding opportunity would focus on three areas:

- 1. Mitigating methane emissions and reducing other air pollution associated with existing wells and infrastructure. Funds would be provided to mitigate and monitor methane emissions from low-producing wells and other oil and natural gas assets, that are owned and/or operated by small producers/operators, through a small number of awards, which would each fund a selected lead entity such as an organization that represents oil and natural gas producers, a non-governmental research institution, university, or Tribal organization. The intent would be for these organizations to manage and optimize the effective distribution of these funds to owners/operators with relevant oil and natural gas assets, including one award focused on mitigating methane emissions from oil and natural gas assets on Tribal lands. This area is anticipated to complement efforts currently being undertaken by states through recently announced formula grants.
- 2. Accelerating the deployment of innovative methane reduction solutions for reducing emissions from petroleum and natural gas systems. This may include efforts to support the field demonstration of near-commercial solutions that can effectively address emissions from difficult-to-mitigate sources on a large scale, to accelerate the implementation of innovative methane emissions reduction technology solutions.
- 3. Characterizing and quantifying methane emissions from oil and natural gas operations across multiple, large geographical regions through the creation of regional methane emissions measurement and monitoring consortia. Activities may include, but are not limited to, methane emissions data collection and acquisition; development of annual emissions estimates at equipment-, facility-, and basin-levels; and training on data and technology usage for workers in the oil and gas industry and communities with environmental justice concerns. The intent would be to develop region-specific collaborative partnerships among oil and natural gas owners and operators, universities, environmental justice organizations, community leaders, workers, technology developers, Tribes, state regulatory agencies, non-governmental research organizations, Federally Funded Research and Development Centers, and DOE's National Laboratories.

The NOI was issued to give applicants ample time to prepare their proposals and form partnerships (if necessary) in anticipation of the upcoming issuance of the funding opportunity announcement. More information, including anticipated eligibility criteria for this NOI, can be found at the <u>FedConnect MERP NOI website</u>. For more information about the Methane Emissions Reduction Program, please visit: <u>https://www.epa.gov/inflation-reduction-act/methane-emissions-reduction-program</u>

REMINDER! The Nuclear Energy Agency's Sixth International Nuclear Emergency Exercise (INEX-6) is being prepared! The exercise focuses on long term recovery (1 year post incident) for a large-scale radiological incident. We have engaged our federal, state, and local partners to participate in the exercise, and we wanted to encourage Tribes to participate as exercise players as well. We think that this would be an extremely valuable experience for our Tribal partners and would be a great opportunity for relationship building and collaboration related to radiological emergency preparedness & radiation protection. Email Montecalvo.Danielle@epa.gov for more information.

REMINDER! The Department of Energy has funding available for Tribes through their Energy Efficiency and Conservation Block Grant Program! These are formula grants available to all Tribes. There are options for vouchers or technical assistance in place of a formal grant which would reduce the burden of applying. <u>Click here for more information</u>!

REMINDER! EPA finalizes stronger standards for harmful soot pollution, significantly increasing health and clean air protections for families, workers, and communities.

Stronger standard will yield up to \$46B in net health benefits, save lives, and build healthier communities, while supporting economic growth across America

WASHINGTON — The Biden-Harris Administration on Wednesday finalized a significantly stronger air quality standard that will better protect America's families, workers, and communities from the dangerous and costly health effects of fine particle pollution, also known as soot. By strengthening the annual health-based national ambient air quality standard for fine particulate matter (PM_{2.5}) from a level of 12 micrograms per cubic meter to 9 micrograms per cubic meter, the U.S. Environmental Protection Agency's updated standard will save lives — preventing up to 4,500 premature deaths and 290,000 lost workdays, yielding up to \$46 billion in net health benefits in 2032. For every \$1 spent from this action, there could be as much as \$77 in human health benefits in 2032.

Today's action is based on the best available science, as required by the Clean Air Act, and sets an air quality level that EPA will help states and Tribal Nations achieve over the coming years — including through complementary EPA standards to reduce pollution from power plants, vehicles, and industrial facilities, paired with historic investments under President Biden's Inflation Reduction Act and the Bipartisan Infrastructure Law. These actions bolster the U.S. economy by deploying billions of dollars and creating good-paying jobs across the transition to cleaner technologies. This strategy will make Americans healthier and more productive, while underpinning a manufacturing resurgence in America. Since 2000, PM_{2.5} concentrations in the outdoor air have decreased by 42% while the U.S. Gross Domestic Product increased by 52% during that time.

Along with strengthening the primary annual $PM_{2.5}$ standard, EPA is modifying the $PM_{2.5}$ monitoring network design criteria to include a factor that accounts for proximity of populations at increased risk of $PM_{2.5}$ -related health effects to sources of air pollution. This will advance environmental justice by ensuring localized data collection in overburdened areas to inform future NAAQS reviews.

Due to the efforts that states, Tribes, industry, communities, and EPA have already taken to reduce dangerous pollution in communities across the country, 99% of U.S. counties are projected to meet the more protective standard in 2032, likely the earliest year that states would need to meet the revised standard. That's even before accounting for additional actions on the horizon to implement the Bipartisan Infrastructure Law and Inflation Reduction Act investments and to update source-specific emission standards.

See projected progress in 2032.

EPA is also revising the Air Quality Index to improve public communications about the health risks from $PM_{2.5}$ exposures.

Some PM is emitted directly from combustion sources, construction sites, industrial processes, and older diesel engines, while other particles are formed in the atmosphere in complex chemical reactions with other pollutants such as sulfur dioxide and nitrogen oxides that are emitted from power plants, gasoline and diesel engines, and certain industrial processes. Particle pollution from industrial processes and other sources is controllable, with readily available and cost-effective technologies to manage emissions, and EPA will build on decades of experience in providing flexible options to states and Tribes across the implementation process.

EPA carefully considered extensive public input as it determined the final standards. The agency held a virtual public hearing and received about 700,000 written comments before finalizing today's updated air quality standards.

See more information on today's final standards at <u>Final Reconsideration of the National</u> <u>Ambient Air Quality Standards for Particulate Matter</u>.

REMINDER! EPA Grants Indirect Cost Rates Webinar

EPA's Office of Grants and Debarment is pleased to confirm that materials from the EPA Grants Indirect Cost Rates Webinar held on December 6, 2023, are now available on the <u>EPA Grants</u> <u>Indirect Cost Rates Webinar webpage:</u>

- Recording of the webinar with closed captions
- Helpful web links from the presentation
- A list of Questions & Answers based on questions submitted by attendees during the webinar
- Presentation slides in PDF format

If you have questions about the posted materials or need more information on EPA's grants award process, please email <u>EPA_Grants_Info@epa.gov</u>. Thank you for your interest in EPA's grants programs.

REMINDER! CPRG Updates

Technical Assistance Forums

Click <u>here</u> for the latest Questions and Answers from the Technical Assistance Forums: Climate Pollution Reduction Grants Technical Assistance Forums Questions and Answers (January24, 2024).

EPA continues to update the <u>CPRG Planning Grantees Contact Information</u> on the CPRG website. If you're the lead organization for a CPRG planning grant and you have a public website for your CPRG planning effort, please email <u>CPRG.EPA@endyna.com</u> to add the URL to our directory!

Planning Grant Trainings

EPA's website contains links to several recorded trainings on the required elements for the Priority Climate Action Plans due in early 2024. Each training is 1-1.5 hours long including Q&A.

Please visit the <u>CPRG Training, Tools and Technical Assistance webpage</u> to watch the training recordings and view presentation slides and additional Q&A documents for questions that were not answered during the recorded Q&A session of the training. The webpage also includes links to resources organized by workplan elements.

UPDATED! EPN Updates

Access more details (and external links) here: <u>Federal Funding Opportunities and Guidance</u> (March 4, 2024).

Below and on our website you will find resources and information on:

- USDA's Urban Agriculture and Innovative Production Grant Program
- EPA's Environmental and Climate Justice Community Change Grants (Change Grants)
- EPA's Climate Pollution Reduction Implementation Grants (CPRG)
- Virtual Office Hours and Webinars
- An Update on Our Work (via our bimonthly newsletter EPN in Action)

USDA's Urban Agriculture and Innovative Production Grant Program

1) FY2024 United States Department of Agriculture's Urban Agriculture and Innovative Production (UAIP) Grant Program

The UAIP Grant Program funds planning and implementation projects, with priority for areas facing food and nutrition insecurity. Grants range from \$75,000 to \$350,000. Eligible entities include non-profits, local government, tribal organizations, and schools K-12. Applications are **due Tuesday, April 9, 2024.** Go to #1 on our <u>website</u> for more information.

EPA's Environmental and Climate Justice Community Change Grants (Community Change Grants)

2) <u>6-step Application Guides for Community Change Grants</u>

EPN has added a <u>Track II</u> sample proposal narrative to its <u>6-step application guides</u> for the <u>Change Grants.</u> You will also find a sample proposal narrative for <u>Track 1</u>, plus additional templates/samples for Track I attachments. Although the final deadline for the Change Grants is November 21, 2024, EPA plans to review applications on a rolling basis each month, and there may be initial award announcements as soon as March 2024. As such, EPN suggests that applicants (who are ready) submit applications ASAP. Please reach out to info@environmentalprotectionnetwork.org if you would like additional help. Go to #2 on our website for more information.

3) Community Change Grants Target Investment Areas (TIAs) Webinars

EPA will hold a series of informational webinars specifically for TIAs: Tribes in Alaska, other Tribes, Territories, Disadvantaged Unincorporated Communities, and US-Southern Border Communities. Each webinar will last between 60-90 minutes and will cover application requirements, eligible entities, eligible project activities, and other helpful information on the specific TIAs. Go to #3 on our <u>website</u> for more information and to register.

4) Community Change Grants Updated Information

EPA's Office of Environmental Justice and External Civil Rights (OEJECR) has updated and modified two important documents for the Change Grants, including a comprehensive Frequently Asked Questions (FAQs) document and a modified Notice of Funding Opportunity to clarify certain areas. Go to #4 on our <u>website</u> for more information.

5) Community Change Technical Assistance Program (CCTA) and Community Change Equitable Resilience Technical Assistance (CCER TA)

As a reminder, EPA is offering two pro bono technical assistance to Community Change Grants applicants through CCTA and CCER TA for applicants in disaster-prone areas. In addition, CCTA is holding a series of informational webinars **weekly on Tuesdays**, **3-4 pm ET**, **through at least March 2024.** Go to #5 on our <u>website</u> to apply for EPA's pro bono assistance and to register for these helpful webinars.

6) Funding to Help Communities Apply for Federal Funding

The Just Transition Fund is a national philanthropic organization that provides grants (up to \$100k) and technical assistance to help communities impacted by the decline of the coal industry

apply for federal funding, like EPA's Community Change Grants program. Nonprofit organizations and local governments located in a community with a coal plant and/or mine are eligible to apply if they're applying for federal funding for an economic development, workforce, or broadband infrastructure project. Go to #6 on our <u>website</u> for more information.

EPA's Climate Pollution Reduction Implementation Grants (CPRG)

7) <u>Step-by-Step Guides to the CPRG Implementation Application Process</u> EPN has created application guides for the <u>General Competition</u> (due April 1, 2024), and the <u>Tribal/Territories Only Competition</u> (due May 1, 2024) and for <u>Applicants Interested in</u> <u>Applying to both the General Competition and the Tribal and Territories Only Competition</u>. Go to #7 on our <u>website</u> for more information.

8) CPRG Implementation Grants Webinar on FAQs

EPA hosted a webinar on the CPRG Implementation Grants competitions on February 15th, reviewing frequently asked questions (FAQs). Go to #8 on our <u>website</u> for more information and to access presentation materials.

9) Updated CPRG Implementation Grants Questions and Answers (Q&As)

General Competition questions and answers were updated on February 16, 2024, and Tribes and Territories competition questions and answers were updated February 6, 2024. Go to #9 on our <u>website</u> to access these.

Virtual Office Hours and Webinars

10) EPN <u>SAM.gov</u> Registration Office Hours

Please join us every other Wednesday (the next one is Wednesday, March 13) **at 2pm eastern.** EPN staff will help you begin, continue, or finish up your registration process. As a reminder, federal funding applicants must have an active SAM.gov and Grants.gov registration in order to apply, and subawardees must have a Unique Entity Identifier (UEI) number issued via <u>SAM.gov</u> as well as a valid registration on <u>SAM.gov</u>. The UEI is used to validate and verify U.S. contractors. Go to #10 on our <u>website</u> for more information.

11) IRS Office Hours - Elective Pay/Direct Pay

The IRS is hosting additional office hours to help entities with the pre-filing registration process. Pre-filing registration is a required step for applicable entities and eligible taxpayers to take advantage of elective payment/direct pay or transfer of credits available in the Inflation Reduction Act and CHIPS Act. **Registration is required.** Go to #11 on our <u>website</u> for more information.

Update on Our Work - Click to read: EPN's Bimonthly Newsletter: <u>EPN In Action:</u> January-February 2024

REMINDER! Seeking Grant Application Reviewers - Compensation Available!

Are you interested in Environmental and Climate Justice? Do you want to participate in the process to award transformative climate action and pollution reduction projects and support community-driven projects that can positively transform people's lives now and in the future? If so, this may be an opportunity for you!

The EPA's Office of Environmental Justice and External Civil Rights is seeking a diverse group of individuals with relevant expertise and experience to review grant applications submitted under our historic <u>\$2 billion Environmental and Climate Justice Community Change Grants</u> Program Notice of Funding Opportunity.

Compensation will be available for non-federal reviewers!

Individuals interested in serving as application reviewers should expect to dedicate approximately 10-15 hours per application reviewed. Reviewers may choose to request to serve during one review cycle or multiple ones. Non-federal reviewers will receive compensation through GrantSolutions for the time spent reviewing grant applications. Non-federal reviewers assigned to a review panel will receive up to \$200 per application reviewed. It is expected that non-federal reviewers will be assigned no more than 10 applications to review.

All reviewers will be required to sign a conflict-of-interest statement prior to reviewing applications.

Interested? Learn more here: <u>http://new.grantreviewinfo.net/FY24-EPA-OEJECR-Climate-Justice-Community-Change-Grants</u>

REMINDER! The Alaska Solid Waste Burning webinars were broadcast on November 16th and December 13th, 2023. The PowerPoint presentations and a recording of the webinar are available <u>HERE</u>.

REMINDER! The EPA has launched a new climate resilience technical assistance program called Community Change Equitable Resilience. The program will consist of free design and project development assistance, community engagement, and partnership development workshops, with the intent to help eligible entities apply for grants under EPA's <u>Community</u> <u>Change Grants</u> Notice of Funding Opportunity (NOFO).

Eligible projects for this technical assistance must be located in a disaster-prone area and benefit a disadvantaged community.

The requestor can propose up to three sites for design assistance. Climate resilience projects must have a direct community benefit and could include retrofits to community-serving buildings; design or redesign of public parks, open space, and waterways; redesign of streets; or other projects that address climate resilience and environmental justice.

Proposed projects should address climate change impacts such as extreme heat and more intense heat islands, wildfire and wildfire smoke, floods, storms, or other impacts that pose a greater risk to disadvantaged communities.

EPA intends to offer this technical assistance to up to 50 recipients nationwide and will accept requests on a rolling basis until 50 recipients have been identified.

We hope you consider submitting a request for assistance! You can find more information at: <u>https://www.epa.gov/inflation-reduction-act/community-change-equitable-resilience-technical-assistance</u>. Please email <u>equitableresilience@epa.gov</u> with questions.

REMINDER! The Environmental Justice Community Change grants were announced! https://www.epa.gov/inflation-reduction-act/inflation-reduction-act-community-change-grantsprogram

- This grant opportunity is a bit different in that there is a 1-year rolling application window.
- There is also a technical assistance program available to assist communities to develop their projects: <u>https://www.epa.gov/inflation-reduction-act/community-change-equitable-resilience-technical-assistance</u>

• If you know folks that would be a good fit for this opportunity, please encourage them to submit their TA request form soon.

REMINDER! EPA Grants Competition Process Webinar

EPA's Office of Grants and Debarment is pleased to confirm that materials from the EPA Grants Competition Process Webinar held on September 26, 2023, are now available on the <u>EPA Grants</u> <u>Competition Process Webinar webpage</u>:

- Recording of the webinar with closed captions
- Helpful web links from the presentation
- A list of Questions & Answers based on questions submitted by attendees during the webinar
- Presentation slides in PDF format

If you have questions about the posted materials or need more information on EPA's grants award process, please email <u>EPA_Grants_Info@epa.gov</u>.

REMINDER! SMOKE: State of the Science

The recording for the virtual session <u>SMOKE: State of the Science</u> is now posted on the Rocky Mountain Research Station website in case you missed it or would like to share with others.

REMINDER! A revised version of the AERMOD Modeling System (dated 23132) has now been posted to the EPA's SCRAM website and replaces the previous version (dated 22112). Specifically, the AERMET and AERMOD executables, source code, documentation, and test cases have been updated. The respective links to the updated version of the AERMOD Modeling System are https://www.epa.gov/scram/air-quality-dispersion-modeling-preferred-and-recommended-models#aermod and https://www.epa.gov/scram/meteorological-processors-and-accessory-programs#aermet.

In addition, the MMIF meteorological preprocessor (version 4.1) has been posted to EPA's SCRAM website and replaces MMIF (version 4.0) to address new features for processing overwater prognostic data through AERMET v23132. MMIF v4.1, related documentation, and updated guidance on the use of MMIF for AERMOD applications can be downloaded at https://www.epa.gov/scram/air-quality-dispersion-modeling-related-model-support-programs#mmif.

REMINDER! <u>Communities First Fund</u>'s (CFF) <u>Rapid Response Fund</u> will provide rapid response funding to support organizations' or coalitions' needs to position themselves or others to respond to infrastructure crises, movement moments, and time sensitive federal funding notices or rulemaking that require rapid mobilization. The Fund has a national scope with specific priority given to geographies that have historically received disproportionate public investment, including the Midwest and the South. **Applications will be reviewed bi-monthly** (**1st Friday and 3rd Friday of each month**), and awards will be determined by the CFF team. <u>The Rapid Response Fund is limited to \$1,000,000</u>. **Grants will be distributed on a rolling basis until the fund is spent down.** Awards will range between \$10,000 - \$100,000 depending on scope and scale of the work funded.

REMINDER! WRI recently put out a report on <u>Catalyzing Local Clean Energy: A</u>

Roadmap for Maximizing Inflation Reduction Act Opportunities and Community Benefits. The guidebook provides a detailed breakdown of new clean energy tax credits and bonuses available to local governments and other eligible entities. It also includes several sample case studies showing how local governments can use these incentives in their clean energy planning as well as analyzing the savings and community benefits these incentives could provide to local governments of all sizes, types, and geographic locations. **REMINDER!** Thank you to those who attended the "Starting a Firewood Bank" webinar!

For those who were unable to attend, here is your access to the recording: <u>https://maine.zoom.us/rec/share/cIz_axl8dkMhsZtc2VCjJyFBWHbwIAkXWY-yhvjuLSHTfKYObni-fbU_hFLGh-Gq.gkd6u2SftO7MOI7G</u> Passande: AAIa142a

Passcode: A^JqJ43g

REMINDER! Now Available! Overview documents on EJ financial and technical resources for Tribes and Indigenous peoples:

1. <u>EPA EJ Program Financial and Technical Assistance Programs and Resources, October</u> 4, 2023

Environmental and Climate Justice Community Change Grants Program, September 25, 2023

3. <u>Environmental Justice Thriving Communities Grantmaker Program Subawards,</u> September 14, 2023

REMINDER! EPA Announces New Climate Pollution Reduction Grant Resource for Planning Grants: Capacity Building Through Effective Meaningful Engagement Booklet Today, EPA announces a new resource for the Climate Pollution Poduction Planning Grant

Today, EPA announces a new resource for the Climate Pollution Reduction Planning Grant, Capacity Building Through Effective Meaningful Engagement Booklet. As CPRG planning grantees think through climate action planning, meaningful engagement with communities must be at the center. When this critical aspect of strategic planning is done right – from equitable design, inclusive decision-making, input touchpoints with all communities, community partners and interested parties throughout the process – there's greater buy-in to support change and drive impact. Knowing that grantees are coming into this planning process with varying experiences, we wanted to provide a new resource. The "Capacity Building Through Effective Meaningful Engagement Booklet" is a tool intended to help create or expand plans for engaging meaningfully with communities. No two approaches to meaningful engagement will be exactly alike. We hope this tool helps spark ideas on how to build trust within communities through meaningful engagement. To learn more, please access the booklet at https://www.epa.gov/inflation-reduction-act/cprg-training-tools-and-technical-assistance

To complement the Investing in America: Climate Action Funding Fair, the <u>Investing in</u> <u>America: Climate Action Funding Resource Guide</u> is now available! This Guide identifies a variety of tracking tools as well as provides an extensive list of programs that reduce greenhouse gases.

REMINDER! Grants Update: Required Use of ID.me to Sign into ASAP.gov and Establishment of New EPA General Terms and Conditions

The U.S. Environmental Protection Agency's (EPA) Office of Grants and Debarment has published <u>RAIN-2023-G03</u> and <u>RAIN-2023-G04</u>.

<u>RAIN-2023-G03</u>: This Recipient/Applicant Information Notice (RAIN) informs recipients and applicants of the U.S Department of Treasury's Automated Standard Application for Payments (ASAP) requirement to use ID.me to log into ASAP.gov by September 15, 2023.

<u>RAIN-2023-G04</u>: This Recipient/Applicant Information Notice (RAIN) informs recipients of the addition of new General Terms and Conditions. Please see each RAIN for more information.

If you have questions about these RAINs, please send email directly to <u>EPA_Grants_Info@epa.gov</u>.

REMINDER! EPA Grants Trainings Available!

EPA's Office of Grants and Debarment is pleased to announce the availability of several new and updated training resources for grant applicants and recipients.

- NEW—Learn how to <u>Register in SAM.gov and Grants.gov</u> to apply for EPA grants. This webpage will help you register your organization in SAM.gov, create an applicant profile in Grants.gov, and get familiar with using Workspace.
- The <u>How to Develop a Budget training</u> was recently updated. This course will help you prepare work plans, budgets, and budget narratives for EPA grants.

• The <u>EPA Grants Management Training for Applicants and Recipients</u> course introduces key aspects of the grant life cycle starting with preparing an application through closing out a grant. The six modules can be completed individually.

Reminder: Stay tuned to <u>EPA's Grants Webinars</u> schedule to register for upcoming webinars and access recordings, helpful links, and FAQs.

If you have any questions regarding these trainings or have suggestions for new training or webinar topics, please send an email to <u>EPA Grants Info@epa.gov</u>

REMINDER! The White House: FACT SHEET: How the Inflation Reduction Act Helps Tribal Communities

By signing the Inflation Reduction Act, President Biden is delivering on his promise to meet the climate crisis and build an economy that works for working families, including Tribal nations and American Indian, Alaska Native, and Native Hawaiian families. The Inflation Reduction Act lowers prescription drug costs, health care costs, and energy costs. It's the most aggressive action we have taken to confront the climate crisis. It'll lower the deficit and ask the super wealthy and corporations to pay their fair share. And no one making under \$400,000 per year will pay a penny more in taxes. <u>Click Here for FACT SHEET.</u>

Climate Change / Energy

The Tribal Climate Change Guide is a searchable database that features up-to-date information on available grants, adaptation plans, climate programs, and climate tools to assist Native peoples in addressing impacts of climate change on their communities and ways of life. The guide also features national events, climate job postings, education resources, publications, and a directory of climate change scientists. <u>https://toolkit.climate.gov/tool/tribal-climate-change-guide</u>

Toxics/Mobile Sources

Indoor Air Quality

REMINDER! Did you know... When a person smokes or vapes, they inhale the chemicals in the product. People around the smoker or vaper are also exposed to these chemicals – this exposure is called secondhand exposure.

<u>Secondhand tobacco smoke</u> exposure can cause lung cancer, cardiovascular disease like heart disease and stroke. It can result in premature deaths from these conditions **among non-smoking** adults.

In **infants and children**, secondhand tobacco smoke can cause health problems that include sudden infant death syndrome and respiratory and ear infections.

For **children with asthma**, secondhand tobacco smoke is <u>an asthma trigger</u> that can cause more frequent and severe asthma attacks.

Secondhand tobacco smoke can **move between rooms** of a home and may remain indoors for a long time – even after a person is finished smoking. Air cleaners cannot fully eliminate secondhand tobacco smoke from the air.

<u>Secondhand marijuana smoke</u> contains **many of the same toxic and cancer-causing chemicals** found in tobacco smoke and may contain some of those chemicals **in higher amounts**.

Even secondhand <u>aerosols from vaping</u> (secondhand e-cigarette aerosols) and secondhand tobacco smoke can contain similar harmful substances.

The **only way** to fully eliminate secondhand exposure is to prohibit smoking and vaping in indoor spaces, including in cars, and away from building air intakes, doors, open windows, and other enclosed spaces.

If you smoke or vape and want to quit, you can find a <u>list of resources here</u>. Doing so will help you and your loved ones.

Learn more about:

- <u>Secondhand Smoke/Aerosol Exposure</u>
- Indoor Air Quality

REMINDER! Webinar Recording Available: Health Implications of Ozone- and PM-Producing Indoor Air Cleaners

On Aug. 2, EPA hosted a webinar about indoor air cleaners featuring Dr. Jose-Luis Jimenez of the University of Colorado Boulder.

Some air cleaners produce ozone or particulate matter, which can degrade indoor air quality. In his presentation, Dr. Jimenez examined these types of air cleaners and compared the estimated reduction in mortality due to reduced airborne disease transmission (COVID-19 and flu) with the estimated increase in mortality due to degradation of indoor air quality. <u>Watch the recording here.</u>

REMINDER! Factsheets Available for Schools Facing Climate Change

Get Tips for School Staff and Parents for Creating Cleaner Air and Cooling Centers at Schools EPA's latest factsheets are designed to help schools and communities that are facing the consequences of climate change.

As extreme weather events such as wildfires and heatwaves overlap with other stressors such as infectious diseases like COVID-19, it's important for schools and their partners to work together to mitigate the health risks to students and the community.

Children are uniquely vulnerable to extreme heat and wildfire smoke, because of their size, physiology, and factors that include playing outdoors and having less control over their environment and exposure to harm.

About the Factsheets: The <u>Schools as Cleaner Air and Cooling Centers: Tips for Facility</u> <u>Managers, Principals, Teachers, and Parents and Caregivers</u> factsheets discuss a variety of approaches for mitigating the health consequences of these natural disasters such as:

- HVAC and maintenance considerations;
- Recommendations for planning and partner coordination;
- Emergency checklists; and
- A suite of additional resources

REMINDER! IAQ Office Hours – April 18, from 10-11 AM Alaska, 11AM-12PM PT, 12-1 PM MT, 1-2 PM CT, 2-3 PM ET.

NOW HIRING!

REMINDER! The Houlton Band of Maliseet Indians is actively looking for a fisheries

biologist to join their team of natural resources professionals to further our work "to sustain and manage HBMI's natural resources for the continuing benefit of Maliseet human, cultural and ecosystem health". Join us working with a variety of partners to achieve a shared vision of watershed restoration including restoring sea run fish to our Wolastoq-St. John Watershed.

This position is located in Houlton/Littleton, Aroostook County Maine and includes paid time off, paid insurance benefits, and 401(k). Application can be found at <u>Career Opportunities</u> <u>Houlton Band of Maliseet Indians (maliseets.net)</u> along with the full job description <u>HBMI_Fisheries_Biologist_Position_DescriptionFinalApproved-02-27-24.pdf (maliseets.net)</u>

REMINDER! Hopi Tribe DNR... Now Hiring!

There are several open positions with the Hopi Tribe Department of Natural Resources, positions include:

Wildlife Ecosystems Management Program

- Program Manager
- Forester/Woodland Ecologist
- Wildlife Biologist (coming soon!)

Water Resources Program

• Water Resource Technician II

Range Management

- Range Technician
- Range Conservationist

https://www.hopi-nsn.gov/tribal-services/human-resources/job-listings/

REMINDER! National Indian Health Board – Thriving Communities Technical Assistance Center Senior Manager

The National Indian Health Board (NIHB) seeks an experienced environmental program professional to focus on environmental technical assistance projects. The position will have a focus on National Indian Health Board's Environmental Justice Thriving Communities Technical Assistance Center, connecting Tribal environmental programs to existing funding opportunities, providing technical assistance to Tribes on federal grant applications related to environmental justice, and elevating issues impacting Tribal environmental health. The position is full-time, salaried, and may include travel up to 20% of the time. Position base in Washington, DC, is preferred but not required. Click here for more information.

REMINDER! National Indian Health Board – Environmental Health Project Associate

The National Indian Health Board (NIHB) seeks an entry-level public health professional to work on environmental health projects. The position will have a focus on National Indian Health Board's Environmental Justice Thriving Communities Technical Assistance Center, which connects Tribal environmental health programs to existing funding opportunities, provides technical assistance to Tribes on federal grant applications, and elevates issues impacting Tribal environmental health. The position is full-time, salaried, and may include travel up to 20% of the time. This position is based in Washington, DC. Click here for more information.

REMINDER! National Indian Health Board – Public Health Policy & Programs Project Coordinator (Climate & Environmental Health)

The National Indian Health Board (NIHB) seeks an experienced public health professional to work on current and future public health projects and initiatives. The position will have a focus on creating and coordinating projects that focus on improving the state of Tribal environmental health and environmental justice and Tribal environmental health systems. The position will work on a team with an Environmental Health Program Director, Manager, Coordinators, Associates, and Interns. The coordinator will also work with colleagues in the Public Health Policy & Programs Department and organization-wide, to coordinate and implement public health events, including the NIHB National Tribal Public Health Summit. Included in the above duties, the coordinator will deliver technical assistance, coordinate, and facilitate meetings with stakeholders, draft communications, and keep records of all project accomplishments. This position is based in Washington, DC, and requires up to 20% travel. Click here for more information.

REMINDER! National Indian Health Board - Public Health Policy & Programs Program Evaluator

The National Indian Health Board (NIHB) seeks a highly motivated and uniquely qualified candidate to become our Public Health Policy and Programs (PHPP) Program Evaluator. Reporting to the Public Health Policy and Programs Director, the Evaluator will work across PHPP to oversee all aspects of the evaluation of public health programs and organization-wide, including building internal evaluation capacity. This position will work closely with staff in each subject area to develop and implement appropriate evaluation methods. The Evaluator will assist with evaluation activities related to PHPP, NIHB events, and conferences. This is a full-time, salaried position located in Washington, DC. The selected incumbent is required to live in the Washington, DC metro area upon commencement of position. Some travel (up to 10%) will be required. Click here for more information.

REMINDER! National Indian Health Board - Environment and Climate Justice Grants Coordinator

The National Indian Health Board (NIHB) seeks an experienced professional to provide technical assistance to Tribes on environmental and climate justice funding opportunities. The position will have a focus on National Indian Health Board's Environmental Justice Thriving Communities Technical Assistance Center, connecting Tribal environmental health programs to existing funding opportunities, providing technical assistance to Tribes on federal grant applications, and elevating issues impacting Tribal environmental health. The position is fulltime, salaried, and may include travel up to 20% of the time. Position base in Washington DC is preferred but not required. Click here for more information.

REMINDER! Quinault Indian Nation – Air Quality Program Specialist

The Air Quality Program Specialist is expected to manage a comprehensive air quality program dealing with air quality issues within the Quinault Reservation. This program includes compliance with the Clean Air Act, and Federal Air Rules for Reservations. The incumbent will

conduct ongoing air quality sampling, participate in planning processes, and work with issues related to point and non-point source pollution. The position shall monitor processes within and outside of the Quinault Usual and Accustomed area that may affect air quality. The position will work with other departments within the Division of Natural Resources, and with other divisions of the Quinault Indian Nation on air related issues. This position is currently funded at 30 hours/week or at a 75% position, the position does have the capability of becoming a full time (40 hours) per week if funding is available or acquired in the future. For more information, visit: https://www.quinaultindiannation.com/jobs.htm

REMINDER! EPA Grants Procurement, Subawards, and Participant Support Costs Webinar

EPA's Office of Grants and Debarment is pleased to confirm that materials from the EPA Procurement, Subawards, and Participant Support Costs Webinar held on June 27, 2023, are now available on the <u>EPA Grants Procurement, Subawards, and Participant Support Costs Webinar webpage</u>:

- Recording of the webinar with closed captions
- Helpful web links from the presentation
- A list of Questions & Answers based on questions submitted by attendees during the webinar
- Presentation slides in PDF format

If you have questions about the posted materials or need more information on EPA's grants award process, please email <u>EPA_Grants_Info@epa.gov</u>

Climate Change/Energy

REMINDER! Climate Change Pollution Reduction Grant (CPRG) Update

As part of the Administration's commitment to move quickly to implement the Inflation Reduction Act (IRA), EPA is sharing some additional information about initial thinking and timing on phase 2 of the Climate Pollution Reduction Grants (CPRG). The Climate Pollution Reduction Grants program is a \$5 billion, two-phase grant program that kicked off on March 1, 2023, when EPA issued the program guidance for the first phase of the program – the \$250 million planning grants phase. To ensure compliance with grants competition rules, we have posted some updates about scope and timing of phase 2 to our <u>website</u>.

The Climate Pollution Reduction Grants (CPRG) Implementation Grants Competitions EPA announced the availability of \$4.6 billion across two implementation grant competitions, one general competition and one specifically for Tribes and territories. Under these competitions, eligible applicants will compete for <u>CPRG implementation grants</u> to fund measures in their state-, municipality-, Tribe-, or territory-specific climate action plans. As part of its evaluation of applications, EPA will prioritize measures that achieve the greatest amount of GHG emissions reductions. The deadline to apply to the general competition is April 1, 2024. The deadline to apply to the <u>Tribes and territories competition</u> is May 1, 2024.

• Note that tribes and territories that want to participate in the general competition will still need to meet the March 1 plan deadline.

Further, as we start to receive Priority Climate Action Plans under phase 1 of the program in 2024, EPA will make them available on our <u>web site</u>.

More information on the Climate Pollution Reduction Grants Sign up for notifications about the Climate Pollution Reduction Grants More information about how to register to apply for a grant.

Low-Income Communities Bonus Credit Program: Eligible applicants can <u>apply</u> to receive a 10 or 20-percentage point boost to the energy investment tax credit for qualified solar or wind facilities that are in low-income communities or on Tribal land, are part of affordable housing developments, or benefit low-income households. **Submit applications by November 18th to be reviewed first.** After the 18th, applications will be accepted and reviewed on a rolling basis through early 2024. Go to #3 on <u>our website</u> for more information.

Toxics/Mobile Sources

WRI's Electric School Bus Initiative is helping districts take advantage of this and other funding sources by providing free resources on the school bus electrification process, including a step-by-step guide, a power planner for working with electric utilities, and a market report/buyer's guide detailing the electric school bus models on the road today. If you need help, please reach out to WRI for support.
